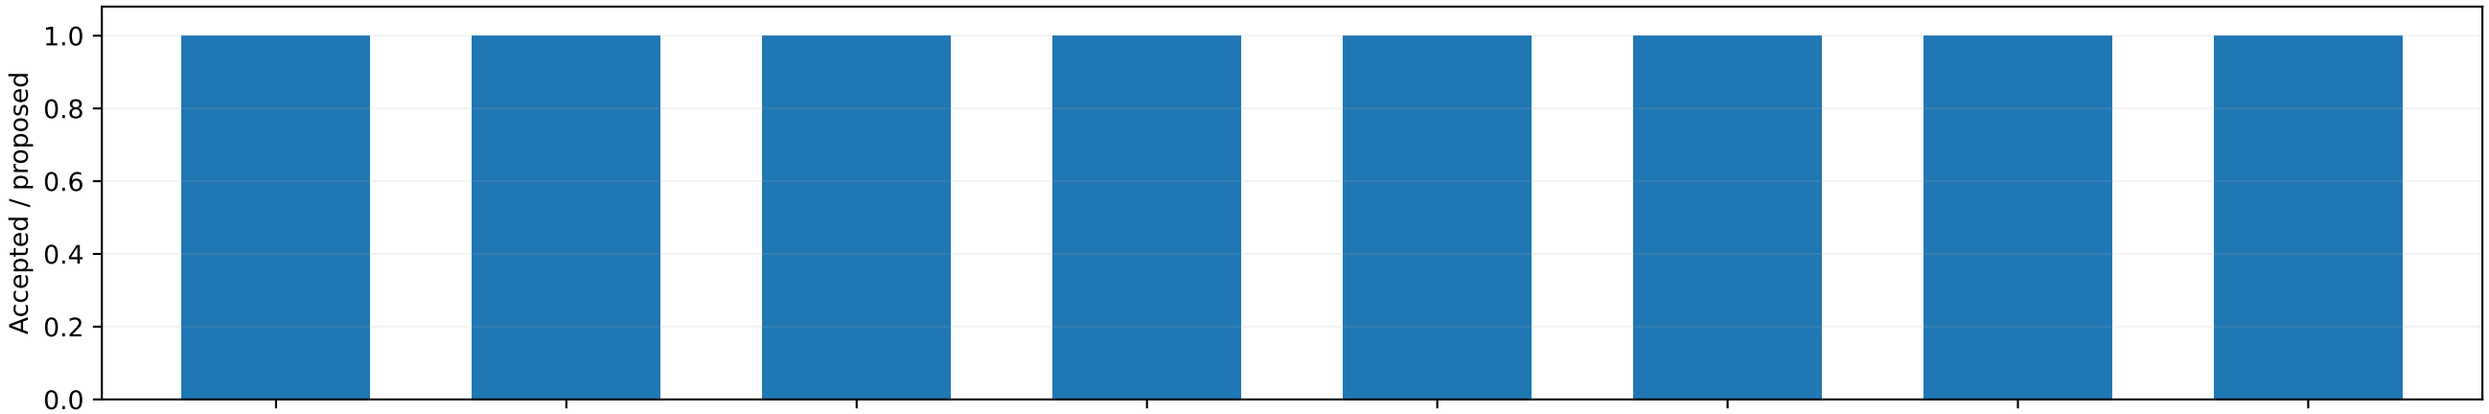
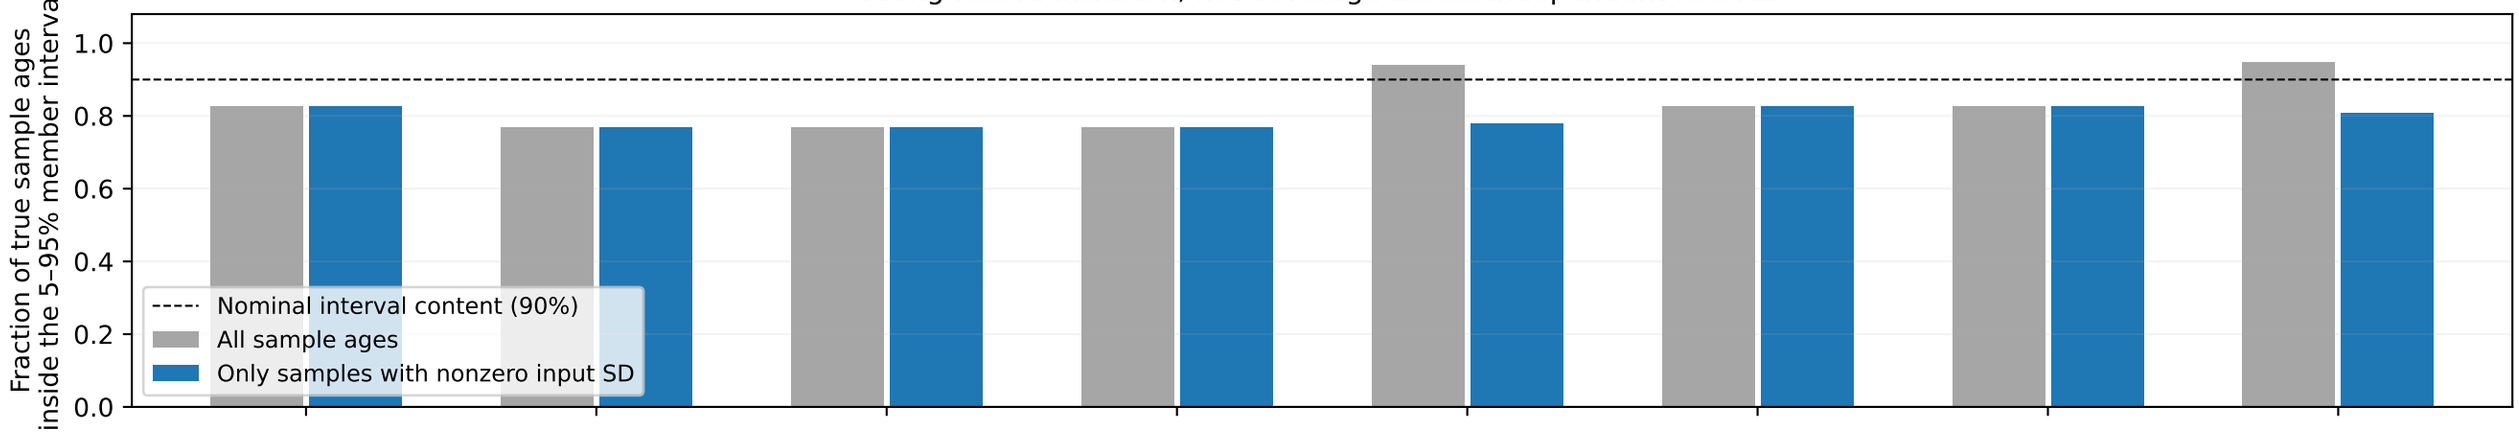
Chronology diagnostics: 10 members per observed record
Level 2: C/L/E peak SD 20 yr; J peak SD 10 yr, 3 peaks, 30% coverage

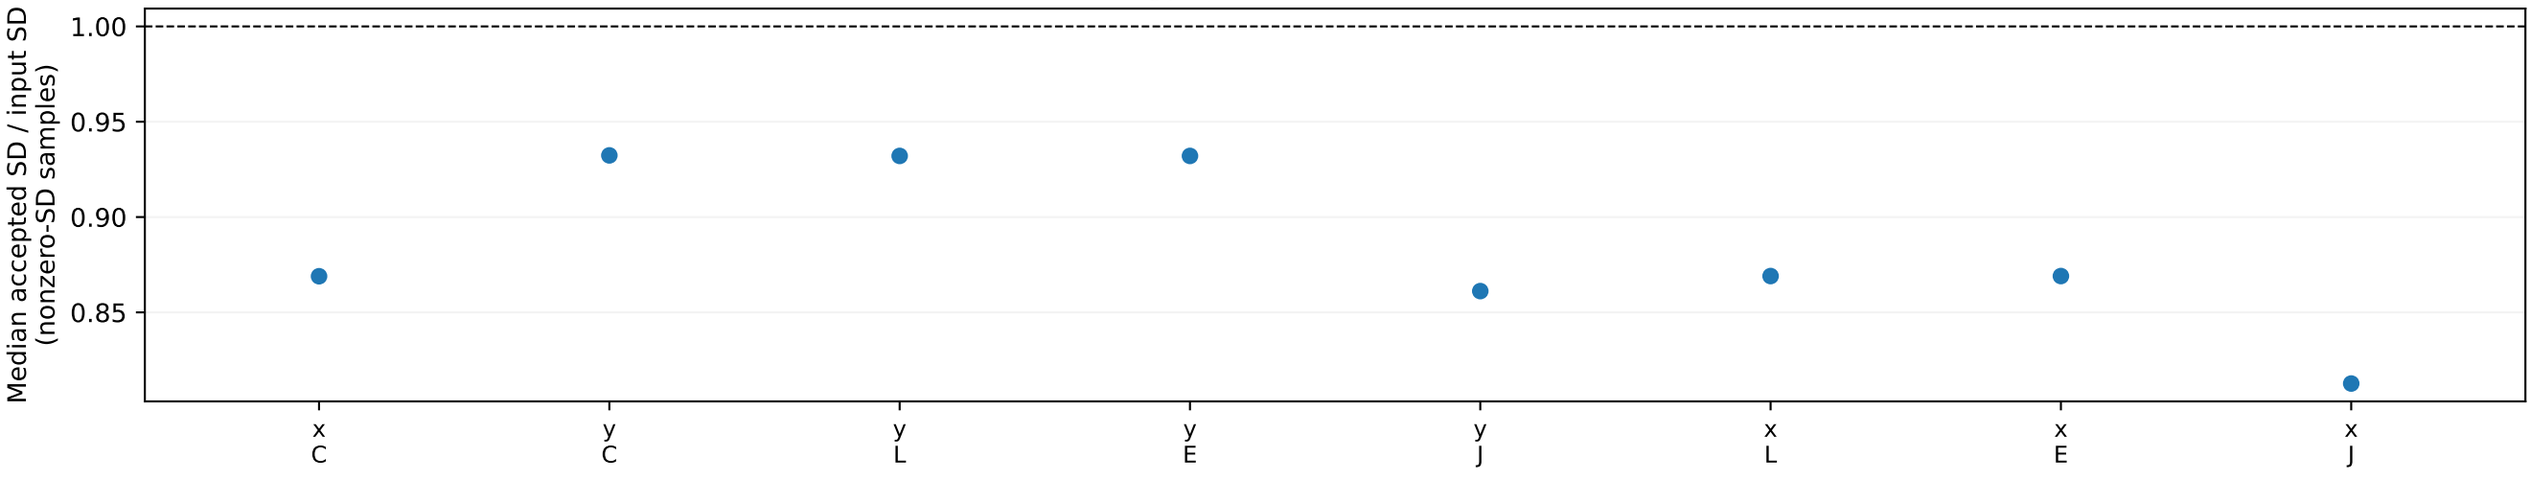
Whole-curve order constraint: proposal acceptance



Along-record inclusion, not coverage across independent records



Accepted chronology spread relative to the unconstrained input



10-member intervals and SDs describe this record. Correlated ages are not independent coverage trials; zero-SD sections can inflate inclusion.
